

I am a XM radio subscriber and would like to voice my opinion on the NAB's attack on XM providing weather and traffic. I have become dependent on these reports as they help in my commute. NAB stations have commercials through out there reports and if i was forced to use there reports i wouldnt get the information in time. NAB stations need to improve there product not use the government to force there competitors to suspend there superior services. I am also appalled at the idea of my tax money being used to try and pass a bill that ultimately will rob me of something i pay for.
